

# Swirl diffuser OD-5

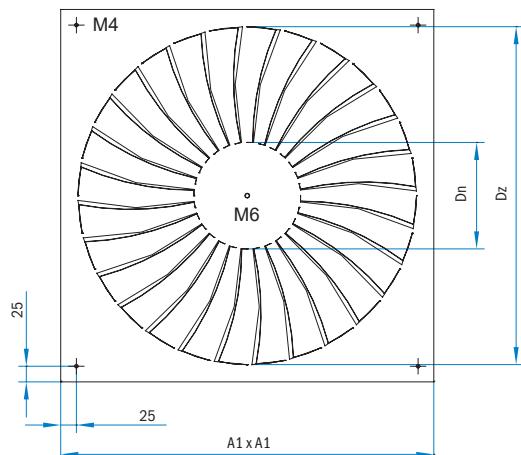

- Fixed grille
- For air supply or exhaust
- Recommended temperature difference between supplied and internal air in the room is between – 10 to 0 K
- Low static pressure drop and low noise level
- Recommended installation height up to 4.5 m
- Diffuser plate should be lined with the ceiling in order to establish the ceiling effect
- Square and circular diffuser plate

## Diffuser plate attachment

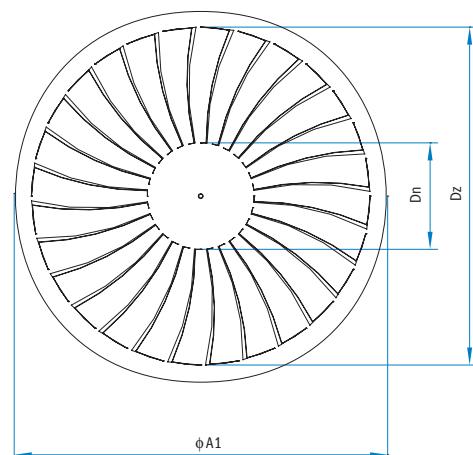

For square diffusers, central fastening OD-5/K1 or fastening with four screws on the edges OD-5/K4 can be selected. For circular diffusers, only the central fastening is provided. Diffusers are usually installed with the plenum box with side or top entry spigot. Plenum boxes with side or top inlet can be selected. If additional air flow regulation is required, the plenum box with the M volume control damper is recommended.
